EXCEPTIONAL NEW LINE OF "EXEMPT SOLVENT" CURING AND SEALING COMPOUNDS

Ready Right Now...

Euclid Chemical announces an exceptional new line of "exempt solvent" curing and sealing compounds that surpass stringent VOC regulations in the OTC region.

Designed to better serve the concrete curing and sealing needs of contractors in the Ozone Transport Commission (OTC) states, Euclid Chemical has developed a family of "exempt solvent" cure & seals that meet the OTC regulations as well as similar VOC rules in other regions of the US. These exempt solvent products offer the same rugged performance as traditional solvent based cure & seals and are an excellent alternative to water based products, which are difficult to use in cooler weather.

- EverClear TB
- Luster Seal 350
- Rez-Seal AC
- Super Diamond Clear AC
- Super Diamond Clear TB

As VOC regulations continue to change in the U.S. and Canada, count on The Euclid Chemical Company to develop and deliver reliable solutions that meet the needs of the concrete construction market.
