

TUNNELING SOLUTIONS

- CONCRETE ADMIXTURES
- PRECAST CONCRETE ADMIXTURES
- TBM PRODUCTS
- BACKFILLING ADMIXTURES
- SHOTCRETE ADMIXTURES
- FIBER PRODUCTS
- CHEMICAL GROUTING PRODUCTS
- ULTRA / MICRO FINE CEMENTS

TUNNELING

COMPLETE CONCRETE SOLUTIONS

With a proven track record of successful partnerships in major tunnel projects across the Americas, Euclid Chemical has solidified its position as an innovative leader in tunneling and underground solutions.

We offer a comprehensive range of products designed to enhance production and performance at every phase of an underground project. Whether it's tunnel construction, soil conditioning, annulus grouting, or repair work, the industry relies on Euclid Chemical to provide quality products and unwavering support.

CONCRETE ADMIXTURES

COMPLETE CONCRETE SOLUTIONS

Euclid Chemical is your partner in tunnel projects to provide proven chemical admixture solutions. Accelguard, Eucon and Plastol brands of high-performance concrete admixtures meet the requirements of ASTM C494, providing the highest quality concrete from basic to the most challenging applications.

WATER REDUCERS

HIGH-RANGE WATER REDUCERS

RETARDERS/SET STABILIZERS

AIR ENTRAINERS

ACCELERATORS

SPECIALTY PRODUCTS

- ▶ Densified Microsilica
- ▶ Corrosion Inhibiting Admixtures
- ▶ Water Repellent Admixtures
- ▶ Crystalline Waterproofing Admixtures
- ▶ Viscosity Modifying/Anti-Washout Admixtures
- ▶ Workability Retaining Admixtures
- ▶ Strength Enhancing Admixtures

PRECAST CONCRETE ADMIXTURES

Euclid Chemical's admixtures are designed for the production of quality precast concrete for projects of all sizes and under the most demanding of conditions. Whatever the project application calls for, Euclid Chemical's ability to pair technology, engineering and service provides the precise formula needed to optimize precast concrete's function and performance.

MECHANIZED TUNNELING

TUNNEL BORING MACHINE (TBM) PRODUCTS

The most demanding tunneling projects rely on Euclid Chemical's innovative cutterhead foams, designed to minimize equipment wear, and our innovative soil conditioners engineered to optimize excavation processes and enhance TBM performance. Tailored to each project's unique requirements, our cutterhead foam products are fully customizable, ensuring superior performance in any environment.

SEAL GREASES

Tail Seal Grease for Shielded TBM - EUCON SG Series

First Filling Material Tail Sealant Grease for TBM

Continuous Tail Sealant Grease for TBM

Main Bearing Seal Grease for Shielded TBM - EUCON SG-B Series

Mineral Oil Based Protective Main Bearing Sealant Grease

Main Bearing Seal Grease

First Filling Tail Seal Grease

Continuous Tail Seal Grease

SOIL CONDITIONING

EUCON CHF 100 Series

Standard liquid cutterhead foaming agent designed for soils to make the movement of TBM faster

EUCON CHF 200 Series

Polymer based liquid cutterhead foaming agent designed for silty and sandy soils

EUCON AC 400 Series

Anti-clay, high efficiency dispersant polymer based cutterhead foaming agent

EUCON SC-P

Polymer used to increase performance of TBM foaming agents in difficult soil conditions for shielded TBM

EUCON ABF 500 Series

Anti-abrasion and dust control agent for hard rock

EUCON DUSTROL

Concentrated agent formulated with special surfactants used specially on hard rock tunnel boring machines, designed to reduce dust

BACKFILLING ADMIXTURES

As the TBM is advanced, the void behind the segment needs to be filled (overcut plus TBM skin thickness). Euclid Chemical provides chemical admixtures that can be used in the annular grouting to fill in the gap in TBM excavation and segmental lining.

HIGH-RANGE WATER REDUCERS

FLOWABLE FILL

CELLULAR CONCRETE

AERLITE Series

ACCELERATORS

EUCON SURESHOT Series

RETARDERS/STABILIZERS

ANTI-WASHOUT ADMIXTURES

SHOTCRETE ADMIXTURES

EUCON SURESHOT

Sodium silicate based liquid set accelerator for shotcrete

EUCON SURESHOT AF

Alkali-free liquid set accelerator for shotcrete

EUCON SURESHOT AF-2LV

Low viscosity alkali-free liquid set accelerator for shotcrete

HIGH RANGE WATER REDUCERS

Provides early and final high strength for high consistency shotcrete mixes with low water cement ratio

MICROSILICA

Microsilica is powder additive which is used to improve the pumping and viscosity performance of shotcrete mixtures

RETARDERS

The concrete admixture that prevents the loss of workability of the shotcrete concrete from the plant to the tunnel site

Dry Shotcrete Powders by request

FIBER PRODUCTS

Euclid Chemical provides micro- and macro-synthetic fibers and steel fibers for concrete and shotcrete reinforcement. These products can be used to control plastic shrinkage cracking of concrete, provide equivalent temperature and shrinkage reinforcing to conventional steel and can also replace limited amounts of steel rebar, add toughness, increase impact and abrasion resistance and improve overall durability.

MICRO-SYNTHETIC FIBERS

PSI FIBERSTRAND

MACRO-SYNTHETIC FIBERS

TUF-STRAND SF FIBERS

STEEL FIBERS

PSI STEEL FIBERS

GROUTING PRODUCTS

Polyurethane chemical grouts are an excellent solution for sealing leaking cracks and fractures within sound substrates, as well as for the stabilization of unsound earthen materials. Cementitious grouts with micro- and ultra-fine cements provide soil consolidation and waterproofing through injection of fissures and micro voids within precast concrete segments.

MICRO AND ULTRA FINE CEMENT

POLYURETHANE RESINS

EPOXY INJECTION RESINS
